

SBG Programmatic Perspective

Woody Turner, Ben Phillips, Laura Lorenzoni

Open Source Science for ESO Mission Processing Study Workshop #1
October 19-20, 2021

OSS/Project schedule alignment

Benefit from a more detailed schedule as soon as possible that outlines when decisions will be made about OSS requirements, and what capabilities or services OSS will provide for missions to leverage

Enabling partnerships

Maintain an open dialogue from the missions on partnering data dependencies, and from the OSS initiative to ensure that good intent doesn't inadvertently preclude important partnering mechanisms

Environmental justice, equity, diversity, and inclusion

Two-way dialogue with historically excluded communities across all fronts – in the OSS initiative; at the mission level in the diversity of the teams, outreach, and implementation; and in our program management at HQ
